The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 80-84 are rejected under 35 U.S.C. 102(e) as being anticipated by Okazaki et al..

Regarding claims 80 and 83, referencing Figure 10, Okazaki et al. discloses a light emitting device having a stack of layers (1-4) including semiconductor layers provided with an active region (3), an optical element (22) bonded to the stack; and a first contact (5) and a second contact (6) electrically coupled to apply a voltage across the active region; wherein the stack of layers (1-4) comprises at least one III-Phosphide semiconductor layer (Column 13, lines 4-14) and the first contact (5) and the second
